

IN THE CLAIMS

This listing of claims replaces all prior listings:

1. (Previously Presented) A method for downloading a file to a personal data assistant (PDA) comprising:
 - receiving a user input that indicates a user preference of desired functions of a set of functions that are associated with an application corresponding to said file;
 - determining at least one function of said set of functions responsive to said user input;
 - and
 - dynamically downloading said file and the at least one function to said PDA.
2. (Canceled).
3. (Previously Presented) The method of claim 1 wherein said determining said at least one function further comprises:
 - obtaining said at least one function comprising a family of functions.
4. (Previously Presented) The method of claim 2 wherein said determining said at least one function further comprises:
 - displaying said at least one function as a list.
5. (Previously Presented) The method of claim 3 wherein said determining said at least one function further comprises:
 - using said family to recognize one or more additional functions automatically.
6. (Original) The method of claim 5 further comprising:
 - prompting a user to select said one or more additional functions.
7. (Original) The method of claim 5 wherein said family comprises at least one of mathematical, trigonometric, statistical, mathematical, financial, and scientific functions.

8. (Previously Presented) The method of claim 1 wherein said dynamically downloading said file and the at least one function further comprises:

prompting a user to choose whether to download said file and/or said at least one function.

9. (Previously Presented) A computer program product comprising:

a computer usable medium having computer readable program code embodied therein configured to download a file to a personal data assistant (PDA), said computer program product comprising:

computer readable code configured to cause a computer to receive a user input that indicates a user preference of desired functions of a set of functions that are associated with an application corresponding to said file;

computer readable code configured to cause the computer to determine at least one function of said set of functions responsive to said user input; and

computer readable code configured to cause the computer to dynamically download said file and the determined at least one function to said PDA.

10. (Canceled).

11. (Previously Presented) The computer program product of claim 9 wherein said computer readable code configured to cause the computer to determine said at least one function further comprises:

computer readable code configured to cause the computer to obtain said at least one function comprising a family of functions.

12. (Previously Presented) The computer program product of claim 10 wherein said computer readable code configured to cause the computer to determine at least one function further comprises:

computer readable code configured to cause computer to display said at least one function as a list.

13. (Previously Presented) The computer program product of claim 11 wherein said computer readable code configured to cause the computer to determine said at least one function further comprises:

computer readable code configured to cause the computer to use said family to recognize one or more additional functions automatically.

14. (Previously Presented) The computer program product of claim 13 further comprising:

computer readable code configured to cause the computer to prompt a user to select said one or more additional functions.

15. (Previously Presented) The computer program product of claim 13 wherein said family comprises at least one of mathematical, trigonometric, statistical, mathematical, financial, and scientific functions.

16. (Previously Presented) The computer program product of claim 9 wherein said computer readable code configured to cause the computer to dynamically download said file and the at least one function to said PDA further comprises:

computer readable code configured to cause the computer to prompt a user to choose whether to download said file and/or said at least one function.
